DODDIE PRAWARJITO

Software Engineer | C#/.NET Backend and SQL Server

Tangerang Selatan, Banten | +62 858-8069-5449 | doddiepvroh@gmail.com

linkedin.com/in/doddie-prawarjito | Portfolio: mrrobotdude.github.io

Professional Summary

Software engineer developing C#/.NET applications and API integrations for payroll, attendance, and internal operations. Experience includes SQL Server performance optimization, client payroll calculations validated with HR, and backend delivery for device integrations and a client-used chatbot.

Technical Skills

Backend: C#, .NET Framework 4.8, .NET 10, API development and integration

Databases: SQL Server, stored procedures, query optimization, indexing, SQL Server Management Studio (SSMS)

Web: React, JavaScript, HTML, CSS, Bootstrap

Cloud and tools: Amazon Web Services (AWS): EC2, S3, Cognito; Git, GitLab, Visual Studio

Engineering practice: Unit testing, QA collaboration, system integration testing (SIT), requirements analysis

Professional Experience

PT. BPOSeven Inovasi Indonesia

Junior Developer | August 2025 - Present

- Reduced SQL Server attendance-report stored procedure execution time from approximately 30 minutes to one minute for about 4,000 employees through indexing, temporary tables, and query restructuring.
- Implemented overtime calculations used in client payroll for five- and six-day schedules, shortened workdays, and holidays; validated payable overtime hours through test cases, comparisons, and reconciliation with client HR.
- Built .NET 10 APIs using Hikvision ISAPI to synchronize employee data, employment status, and schedules daily, with a maintenance interface and middleware forwarding device events to the cloud where direct connectivity was restricted.
- Built the initial chatbot backend used by clients to explain payroll rules, holiday allowance (THR) calculations, and taxes, including knowledge-base vector indexing, retrieval, response safeguards, and WhatsApp escalation.
- Investigated defects, wrote unit tests, collaborated with QA, and supported development and SIT deployments; used AWS EC2 for servers, S3 for images and knowledge-base storage, and Cognito for authentication.

PT. Alam Tehnik Semesta

Software Engineer Intern | February 2024 - August 2025

Software Engineer Intern | March 2022 - May 2023

Contributions across both internship placements

- Developed and maintained C# desktop and web applications with SQL Server data processing and reporting for internal operations.
- Built a weekly material-request feature showing quantities, costs, intended use, and outstanding requests, giving procurement teams visibility into weekly purchasing needs.
- Created technical documentation and user guides and supported internal application users.

Research and Technology Transfer, Bina Nusantara University

Web Developer Intern | September 2023 - February 2024

- Developed .NET backend and React frontend features for an academic-writing and revision-tracking pilot used by a professor; handed over continued development to the next intern team.

Freelance Experience

BorongBoil.id

Freelance Web Developer | October 2023 - Present

Concurrent project with maintenance and further development as needed

- Built the frontend and integrated partner-developed APIs for a live automotive website consolidating vehicle listings across branches, with search, filtering, referral tracking, and administration interfaces.

Additional Professional Experience

Software Laboratory Center, Bina Nusantara University

Junior Laboratory Assistant (Full-time) | February 2020 - February 2022

- Led SQL and Java Swing programming labs, assessed assignments and practical examinations, created reusable teaching materials, and trained new laboratory assistants.

Education

Bina Nusantara University | 2019 - 2025

Bachelor of Computer Science (S.Kom.) | GPA 3.47/4.00

Selected Training

Azure AI Basic Fundamentals (AI-900T00-A) | GreatNusa | April 2025

IT Bootcamp Program - Cyber Security | Bina Nusantara University | August 2025
